Household Water Disruption Prep

Small steps. Practical preparation. Keep this page where you can find it.

PLAN WITH WHAT YOU HAVE

- ☐ Multiply people by days (1 gal/person/day) and write your total water need down.
- ☐ Adjust your total up for cooking, washing, pets, or medical needs.
- ☐ Gather clean jugs, bottles, and food-grade containers you already own.
- ☐ Save your utility's contact from your bill and sign up for text/email alerts.

STORE WATER AND BACKUP

- ☐ Fill your containers with clean tap water and label each with the fill date.
- ☐ Stock a backup treatment like purification tablets with your supplies.
- ☐ Keep water, tablets, and utility contact note in one cool, dark spot.
- ☐ Tell everyone in your home where the supplies are kept.

SAFETY NOTE During a disruption, don't guess if tap water is safe. Wait for official word from your utility on when a boil advisory starts or ends.
